

Constructing React Testing Library Queries

`command``[All]``By``QueryType`

`command`

<code>get</code>	expect element to be in DOM
<code>query</code>	expect element not to be in DOM
<code>find</code>	expect element to appear asynchronously

`[All]`

<code>(exclude)</code>	expect only one match
<code>(include)</code>	expect more than one match

`By`

This is always included in the query

`QueryType`

<code>Role</code>	for functional elements like button
<code>AltText</code>	for images
<code>Text</code>	for text display elements
<ul style="list-style-type: none"><code>PlaceholderText</code><code>LabelText</code><code>DisplayValue</code>	for form elements
